

**AMENDMENTS TO THE CLAIMS**

Please add new claims 87-92 as follows.

Please amend claims 1, 3-11, 19-23, 25-28, 38-41, 43, 45-53, 61-65, 67-75, and 83-86 as follows.

1. (Currently amended) A computer-implemented method of language instruction comprising:  
presenting a first text or audio description of an event responsive to a first perspective;  
and  
presenting a second text or audio description of the event responsive to a second perspective,  
wherein the first text or audio description of the event and the second text or audio description of the event are in a common language, and  
wherein the first text or audio description of the event and the second text or audio description of the event provide a language immersion environment for language instruction.
2. (Original) The method of claim 1, further comprising:  
presenting a visual representation of the event.
3. (Currently amended) The method of claim 2, wherein the first text or audio description of the event and the second text or audio description of the event are presented in audio form.
4. (Currently amended) The method of claim 3, wherein the first text or audio description of the event and the second text or audio description of the event are presented in text form.
5. (Currently amended) The method of claim 1, wherein the first text or audio description of the event and the second text or audio description of the event are presented in audio form.

6. (Currently amended) The method of claim 5, wherein the first text or audio description of the event and the second text or audio description of the event are presented in text form.

7. (Currently amended) The method of claim 6, wherein the audio form presentation is synchronized with the text form presentation of either the first text or audio description of the event or the second text or audio description of the event.

8. (Currently amended) The method of claim 1, wherein the first text or audio description of the event and the second text or audio description of the event are presented in text form.

9. (Currently amended) The method of claim 8, wherein the first text or audio description of the event and the second text or audio description of the event are presented simultaneously.

10. (Currently amended) The method of claim 8, wherein the first text or audio description of the event and the second text or audio description of the event are presented on a display monitor.

11. (Currently amended) The method of claim 8, wherein the first text or audio description of the event is presented adjacent to the second text or audio description of the event.

12. (Original) The method of claim 1, wherein the event comprises an interaction involving a first individual and a second individual.

13. (Original) The method of claim 12, wherein the first perspective is responsive to a perspective of the first individual, and the second perspective is responsive to perspective of the second individual.

14. (Original) The method of claim 13, further comprising presenting a third description of the event responsive to a third perspective.

15. (Original) The method of claim 14, wherein the third description of the event comprises a narration of the event.

16. (Original) The method of claim 14, wherein the third description of the event comprises a dialogue between the first and second individual.

17. (Original) The method of claim 14 further comprising presenting a fourth description of the event responsive to a fourth perspective.

18. (Original) The method of claim 17, wherein the third description comprises a narration of the event; and wherein the fourth description of the event comprises a dialogue between the first and second individual.

19. (Currently amended) The method of claim 1, wherein the first text or audio description comprises a first word, and the second text or audio description comprises a second word, and the first word is a synonym of the second word.

20. (Currently amended) The method of claim 1, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is in an active voice and the second phrase is in a passive voice.

21. (Currently amended) The method of claim 1, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is in a first tense and the second phrase is in a second tense.

22. (Currently amended) The method claim 1, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is synonymous with the second phrase.

23. (Currently amended) A system for language instruction comprising:  
a description presentation apparatus comprising a display screen;

wherein the description presentation apparatus presents a first text or audio description of an event;

wherein the description presentation apparatus presents a second text or audio description of the event; and

wherein the first text or audio description of the event is responsive to a first perspective of the event and the second text or audio description of the event is responsive to a second perspective of the event; and

wherein both the first text or audio description of the event and the second text or audio description of the event are in a common language.

24. (Original) The system of claim 23, wherein the description presentation apparatus further comprises a visual event presentation area, and wherein a visual presentation of the event is displayed in the visual event presentation area.

25. (Currently amended) The system of claim 24, wherein the description presentation apparatus further comprises a first text description presentation area and a second text description presentation area, and wherein the first text or audio description of the event is presented as a first text description in the first text description presentation area, and the second text or audio description of the event is presented as a second text description in the second text presentation area.

26. (Currently amended) The system of claim 25, further comprising an audio component, wherein the audio component presents an audio presentation of the first or second text or audio description.

27. (Currently amended) The system of claim 23, wherein the description presentation apparatus further comprises a first text description presentation area and a second text description presentation area, and wherein the first text or audio description of the event is presented as a first text description in the first text description presentation area, and the second text or audio description of the event is presented as a second text description in the second text presentation area.

28. (Currently amended) The system of claim 27, further comprising an audio component, wherein the audio component presents an audio presentation of the first or second text or audio description.

29. (Original) The system of claim 23, wherein the description presentation apparatus comprises a computer screen.

30. (Original) The system of claim 27, wherein the first text presentation area is adjacent to the second text presentation area.

31. (Original) The system of claim 23, wherein the event comprises an interaction involving a first individual and a second individual.

32. (Original) The system of claim 31, wherein the first perspective is responsive to a perspective of the first individual, and the second perspective is responsive to a perspective of the second individual.

33. (Original) The system of claim 31, wherein the description presentation apparatus presents a third description of the event.

34. (Original) The system of claim 33, wherein the third description of the event comprises a narration of the event.

35. (Original) The system of claim 33, wherein the third description of the event comprises a dialogue between the first and second individual.

36. (Original) The system of claim 33, wherein the description presentation apparatus presents a fourth description of the event.

37. (Original) The system of claim 36, wherein the third description of the event comprises a narration of the event; and wherein the fourth description of the event comprises a dialogue between the first and second individual.

38. (Currently amended) The system of claim 23, wherein the first text or audio description comprises a first word, and the second text or audio description comprises a second word, and the first word is a synonym of the second word.

39. (Currently amended) The system of claim 23, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is in an active voice and the second phrase is in a passive voice.

40. (Currently amended) The system of claim 23, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is in a first tense and the second phrase is in a second tense.

41. (Currently amended) The system of claim 23, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is synonymous with the second phrase.

42. (Original) The system of claim 28, wherein the first text description of the event or the second text description of the event, is synchronized with the audio presentation.

43. (Currently amended) A computer program product comprising a computer usable medium having computer program logic recorded thereon for instructing a computer system to:  
present a first text or audio description of an event responsive to a first perspective; and  
present a second text or audio description of the event responsive to a second perspective,

wherein the first text or audio description of the event and the second text or audio description of the event are in a common language, and

wherein the first text or audio description of the event and the second text or audio description of the event provide a language immersion environment for language instruction.

44. (Original) The computer program product of claim 43, wherein the computer system is further instructed to:

present a visual representation of the event.

45. (Currently amended) The computer program product of claim 44, wherein the first text or audio description of the event and the second text or audio description of the event are presented in audio form.

46. (Currently amended) The computer program product of claim 45, wherein the first text or audio description of the event and the second text or audio description of the event are presented in text form.

47. (Currently amended) The computer program product of claim 43, wherein the first text or audio description of the event and the second text or audio description of the event are presented in audio form.

48. (Currently amended) The computer program product of claim 47, wherein the first text or audio description of the event and the second text or audio description of the event are presented in text form.

49. (Currently amended) The computer program product of claim 48, wherein the audio form presentation is synchronized with the text form presentation of either the first text or audio description of the event or the second text or audio description of the event.

50. (Currently amended) The computer program product of claim 43, wherein the first text or audio description of the event and the second text or audio description of the event are presented in text form.

51. (Currently amended) The computer program product of claim 50, wherein the first text or audio description of the event and the second text or audio description of the event are presented simultaneously.

52. (Currently amended) The computer program product of claim 50, wherein the first text or audio description of the event and the second text or audio description of the event are presented on a display monitor.

53. (Currently amended) The computer program product of claim 50, wherein the first text or audio description of the event is presented adjacent to the second text or audio description of the event.

54. (Original) The computer program product of claim 43, wherein the event comprises an interaction involving a first individual and a second individual.

55. (Original) The computer program product of claim 54, wherein the first perspective is responsive to a perspective of the first individual, and the second perspective is responsive to perspective of the second individual.

56. (Original) The computer program product of claim 55, wherein the computer system is further instructed to present a third description of the event responsive to a third perspective.

57. (Original) The computer program product of claim 56, wherein the third description of the event comprises a narration of the event.

58. (Original) The computer program product of claim 56, wherein the third description of the event comprises a dialogue between the first and second individual.

59. (Original) The computer program product of claim 56, wherein the computer system is further instructed to present a fourth description of the event responsive to a fourth perspective.

60. (Original) The computer program product of claim 59, wherein the third description comprises a narration of the event; and wherein the fourth description of the event comprises a dialogue between the first and second individual.

61. (Currently amended) The computer program product of claim 43, wherein the first text or audio description comprises a first word, and the second text or audio description comprises a second word, and the first word is a synonym of the second word.

62. (Currently amended) The computer program product of claim 43, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is in an active voice and the second phrase is in a passive voice.

63. (Currently amended) The computer program product of claim 43, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is in a first tense and the second phrase is in a second tense.

64. (Currently amended) The computer program product claim 43, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is synonymous with the second phrase.

65. (Currently amended) A system for language instruction comprising:  
multimedia presentation means for presenting a first text or audio description of an event responsive to a first perspective; and

multimedia presentation means for presenting a second text or audio description of the event responsive to a second perspective,

wherein the first text or audio description of the event and the second text or audio description of the event are in a common language.

66. (Original) The system of claim 65, further comprising:  
means for presenting a visual representation of the event.

67. (Currently amended) The system of claim 66, wherein the first text or audio description of the event and the second text or audio description of the event are presented in audio form.

68. (Currently amended) The system of claim 67, wherein the first text or audio description of the event and the second text or audio description of the event are presented in text form.

69. (Currently amended) The system of claim 65, wherein the first text or audio description of the event and the second text or audio description of the event are presented in audio form.

70. (Currently amended) The system of claim 69, wherein the first text or audio description of the event and the second text or audio description of the event are presented in text form.

71. (Currently amended) The system of claim 70, wherein the audio form presentation is synchronized with the text form presentation of either the first text or audio description of the event or the second text or audio description of the event.

72. (Currently amended) The system of claim 65, wherein the first text or audio description of the event and the second text or audio description of the event are presented in text form.

73. (Currently amended) The system of claim 72, wherein the first text or audio description of the event and the second text or audio description of the event are presented simultaneously.

74. (Currently amended) The system of claim 72, wherein the first text or audio description of the event and the second text or audio description of the event are presented on a display monitor.

75. (Currently amended) The system of claim 72 wherein the first text or audio description of the event is presented adjacent to the second text or audio description of the event.

76. (Original) The system of claim 65, wherein the event comprises an interaction involving a first individual and a second individual.

77. (Original) The system of claim 76, wherein the first perspective is responsive to a perspective of the first individual, and the second perspective is responsive to perspective of the second individual.

78. (Original) The system of claim 77, further comprising means for presenting a third description of the event responsive to a third perspective.

79. (Original) The system of claim 78, wherein the third description of the event comprises a narration of the event.

80. (Original) The system of claim 78, wherein the third description of the event comprises a dialogue between the first and second individual.

81. (Original) The system of claim 78 further comprising means for presenting a fourth description of the event responsive to a fourth perspective.

82. (Original) The system of claim 81, wherein the third description comprises a narration of the event; and wherein the fourth description of the event comprises a dialogue between the first and second individual.

83. (Currently amended) The system of claim 65, wherein the first text or audio description comprises a first word, and the second text or audio description comprises a second word, and the first word is a synonym of the second word.

84. (Currently amended) The system of claim 65, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is in an active voice and the second phrase is in a passive voice.

85. (Currently amended) The system of claim 65, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is in a first tense and the second phrase is in a second tense.

86. (Currently amended) The system claim 65, wherein the first text or audio description comprises a first phrase, and the second text or audio description comprises a second phrase, and the first phrase is synonymous with the second phrase.

87. (New) A computer-implemented method of language instruction comprising:  
presenting a first description of an event responsive to a first perspective; and  
presenting a second description of the event responsive to a second perspective,  
wherein the first description of the event and the second description of the event are in a common language,

wherein neither one of the first description or the second description is a script of the other of the first description and the second description, and

wherein the first description of the event and the second description of the event provide a language immersion environment for language instruction.

88. (New) A system for language instruction comprising:  
a description presentation apparatus comprising a display screen,  
wherein the description presentation apparatus presents a first description of an event,  
wherein the description presentation apparatus presents a second description of the event,  
wherein the first description of the event is responsive to a first perspective of the event  
and the second description of the event is responsive to a second perspective of the event,  
wherein both the first description of the event and the second description of the event are in a common language, and

wherein neither one of the first description or the second description is a script of the other of the first description and the second description.

89. (New) A computer program product comprising a computer usable medium having computer program logic recorded thereon for instructing a computer system to:  
present a first description of an event responsive to a first perspective; and

present a second description of the event responsive to a second perspective,  
wherein the first description of the event and the second description of the event are in a common language,

wherein neither one of the first description or the second description is a script of the other of the first description and the second description, and

wherein the first description of the event and the second description of the event provide a language immersion environment for language instruction.

90. (New) A system for language instruction comprising:

multimedia presentation means for presenting a first description of an event responsive to a first perspective; and

multimedia presentation means for presenting a second description of the event responsive to a second perspective,

wherein the first description of the event and the second description of the event are in a common language, and

wherein neither one of the first description or the second description is a script of the other of the first description and the second description.

91. (New) The system of claim 23, wherein the description presentation apparatus is selected from the group consisting of a cellular phone, a personal digital assistant, a television, and a game console.

92. (New) The system of claim 65, wherein the first text or audio description of the event and the second text or audio description of the event are presented on one of a cellular phone, a personal digital assistant, a television display, and a game console.
